Canadian Institute for Photonic Innovations

Message to thrust leaders, project leaders, researchers, students and network partners

Within the closure of the CIPI research network, we wish to celebrate the successes of CIPI projects by publishing a special issue of PHOTONS on the “Best of CIPI”.

We would like to publish 10 each of the following success stories:

- Success stories for our students;
- Significant awards to our researchers;
- Partners who significantly contributed and participated;
- Examples of successful collaboration;
- Significant Scientific outcomes;
- Significant Industrial outcomes (start-ups or technology developed);
- CIPI sponsored events.

As trust leader, project leader, researcher, student and network partner, you are in an excellent position to suggest these “best of” candidates from your project areas.

Since this special issue of PHOTONS needs to be published by the end of March, we need you to send us a short paragraph for each suggestion **by February 1st** in order to contact the student, the PI, or the partner to develop the appropriate text to: cipi@cipi.ulaval.ca

Hoping to get many inputs from all of you,

Best regards,

Robert Fedosejevs
Scientific Director

Michel Piché
Deputy Scientific Director
